## Personal Profile

Self-taught Front-End Development at 19, now passionate about full stack development as an end career. I am a hardworking individual seeking a junior developer job to add to my existing development skills. I love Front-End Development and creating well presented UI and a pleasant UX through screen responsiveness with a desire to create websites for the masses.

## Key Skills & Knowledge

Microsoft Office, Visual Studio / Visual Studio Code, HTML, CSS, JavaScript, UI Design, UX Design, Typography, Report Documentation, Photoshop, InDesign.

## Academic Achievements

2020 – 2022 8 Grade Distinction | Computing HND

2018 – 2020 3 BTEC's | Environmental Sustainability, Information Technology and Business

2013 – 2018 8 GCSE's | 4 Grade 4's (English & Maths) | 5 Grade 3's

## Career History

### Early Career

#### Store Assistant, ALDI

2021 – 2022

#### Responsibilities

- Prepared & Carried on my early career in ALDI as a store assistant, working on the shop floor dealing with customers and daily store tasks like shelf stocking and warehouse cleaning.

#### Food Runner, Ego's Mediterranean Bar and Restaurant

2020- 2021

#### Responsibilities

- Began a career whilst I was in college for my HNC / HND as a food runner for Ego's Bar & Restaurant, checking up on condiment stock, delivering food and cleaning the restaurant.

## Hard Skills

Self-taught PC builder. Outsourced compatible components, researched price / performance, and redundancy in components.

Created an online portfolio using HTML, CSS & JavaScript and hosted the website on GitHub / GitHub Pages using a Git extension inside of Visual Studio Code to update my portfolio repository without having to directly update it on GitHub.

## Soft Skills

In my Information Technology BTEC I lead a group of 3, producing an app together to be entered into a competition called "Apps for Good" In a span of 45 days, our team produced an idea with our thought process, mood-board, wireframes & a presentation to finish off.

I have developed my critical thinking skills over time. As an assignment for my HND course I did a research project on "Remote working within education" where I analysed and evaluated the thoughts of remote working from a school and student perspective and concluded whether remote working is any good including the pros and cons from each side.

I believe that my creativity shows through my web creations by using suitable colour schemes, good looking layouts, unique font styling and fancy styled button. My online portfolio shows this using good colour schemes and fonts to make my website stand out from others.
